### CLINICAL INFORMATION

New Start or Initial Request: (Clinical documentation required for all requests)

Requests for a non-preferred intravenous immunoglobulin agent may be approved when the following criteria are met:

Documentation is provided that patient has had a trial and inadequate response or intolerance to TWO preferred intravenous Ig agents;

IVIG Agent 1: \_\_\_\_\_ Date: \_\_\_\_\_

IVIG Agent 2: \_\_\_\_\_ Date: \_\_\_\_\_ OR

Documentation is provided that the preferred Ig agents are not acceptable due to concomitant clinical condition(s), which requires an Ig agent with specific properties. Examples include, but not limited to the following:

Severe IgA deficiency (<7 mg/dL of IgA), or IGA deficiency with antibodies against IgA, requiring agent with very low IGA content; OR

- Hypersensitivity, as manifested by a severe systemic/allergic or anaphylactic reaction, to any ingredient which is not also present in the requested non-preferred agent; OR
- Clinically significant reaction, including, but not limited to, hemolysis or renal dysfunction/impairment, that may be lessened by use of a non-preferred agent with different properties; OR
- The preferred agents are not FDA-approved and do not have an accepted off-label use per the off-label use policy for the prescribed indication and the requested non-preferred agent does.
